

Rakshit Bharatbhai Patel

Lead & Sr Full-Stack Developer

rakshitbharatproject@gmail.com • +91 8000263443 • Pune, India • github.com/rakshitbharat

PROFESSIONAL SUMMARY

Senior Full Stack Developer & Team Lead | 10+ Yrs in Python, Django, FastAPI (REST APIs, Microservices), React, Vue & DevOps | Expert in Enterprise Platforms, Global E-commerce & High-Scale Dashboards.

TECHNICAL SKILLS

⚡ FRONTEND DEVELOPMENT

React React Native Next.js Vue.js Nuxt.js Angular.js Ionic

⚡ BACKEND DEVELOPMENT

Python Django FastAPI Node.js Express.js Next.js

AI & MACHINE LEARNING

OpenAI GPT API ChatGPT integration AI Assistants NLP tools

ML model deployment AI-powered chatbots

DEVOPS & CLOUD SERVICES

AWS (EKS, EC2, S3, RDS, Lambda) Infrastructure as Code (Terraform, Ansible)

Containerization & Orchestration (Docker, Kubernetes)

CI/CD Pipelines (GitHub Actions, Jenkins, GitLab CI)

Monitoring & Logging (Prometheus, Grafana, ELK Stack)

Linux Production Server Administration Nginx & Web Server Configuration

Cloudflare WAF & DNS

VERSION CONTROL

Git GitHub GitLab Bitbucket

PROJECT MANAGEMENT TOOLS

Jira Trello Asana Microsoft Project

PROJECT MANAGEMENT

Version Control Agile Methodologies Project Management Tools

AGILE METHODOLOGIES

Scrum Kanban Agile-Scrum hybrid

PROFESSIONAL EXPERIENCE

Sr Full-Stack Developer

Dec 2022 - Present

Annalect India (Omnicom Group)

(3y 5m)

- Spearhead development of high-profile projects for brands like Škoda, Fiat, and L'Oréal Analysis portal
- Utilize and optimize technologies including React, Storybook, Node.js, and Google Looker Studio
- Engineered stable integration between React and Google Looker Studio, enhancing data visualization capabilities by 40%
- Architect and implement frontend solutions using React, resulting in a 25% improvement in application performance
- Develop and maintain RESTful APIs using Node.js, increasing system efficiency by 30%
- Collaborate with cross-functional teams to define, design, and ship new features
- Ensure the performance, quality, and responsiveness of applications
- Identify and correct bottlenecks and fix bugs, reducing error rates by 50%
- Maintain code quality, organization, and automatization

Lead - Sr React-Developer (With HCLDX-SAP)

Jan 2021 - Dec 2022

Priya Softweb Solutions (Avnet Company)

(1y 10m)

- Led development of a B2B portal using React and SAP integration
- Spearheaded React component implementation within HCL DX CMS for a global e-commerce platform serving over 10 million users
- Developed a groundbreaking package enabling React integration with HCL DX, significantly accelerating project timelines
- Engineered a robust B2B platform for the global electronics industry, handling millions of users and thousands of products
- Managed project timelines, resources, and deliverables
- Conducted code reviews and mentored junior developers
- Collaborated with stakeholders to gather and refine specifications for new features
- Implemented best practices in React development and state management
- Optimized application for maximum speed and scalability
- Participated in architecture discussions and made key technical decisions

Lead Frontend, Sr Full-Stack Dev / Consultant

Jan 2020 - Nov 2021

Anblicks Inc. (Formerly KNOWARTH)

(1y 10m)

- Awarded Star Performer of the year for exceptional contributions
- Led development of IoT-based projects and managed multiple decade-old projects with several sub-projects
- Demonstrated proficiency in IoT, Salesforce, HubSpot, and various CRM systems
- Provided technical leadership and mentoring to junior developers
- Designed and implemented scalable frontend architectures
- Integrated IoT devices with web applications, ensuring real-time data flow
- Customized and extended CRM systems to meet specific client needs
- Conducted technical feasibility studies for new project ideas
- Liaised with clients to understand requirements and provide technical consultations
- Implemented agile methodologies to improve team productivity and project outcomes

PROFESSIONAL EXPERIENCE (CONTINUED)

Sr Full-Stack Dev / Team Lead Riddhi Corporate Services LTD - Led the development of ERP, CRM, and POS products, contributing significantly to career growth - Demonstrated proficiency in React, Django, and Vue.js - Managed cross-functional teams to deliver complex software solutions - Implemented best practices in code quality and project management - Architected and developed full-stack web applications - Designed and implemented database schemas and server-side logic - Integrated third-party services and external APIs - Implemented security and data protection measures - Conducted performance tuning and optimization - Mentored team members on best practices and new technologies	Jan 2017 - Dec 2020 (3y 10m)
Sr Web Developer Yugtia Technologies Private Limited - Successfully created a custom Python framework - Managed self-initiated projects with commendable results - Trained and mentored junior developers, fostering team growth and skill development - Developed and maintained web applications using Python and JavaScript - Implemented responsive design techniques for mobile-friendly websites - Collaborated with designers to implement visual elements - Performed browser testing and debugging - Optimized applications for maximum speed and scalability	Jan 2016 - Dec 2017 (1y 10m)
Jr Web Developer Natraj Infocom - Gained extensive knowledge in web technologies, particularly in Django and FastAPI - Performed exceptionally well while pursuing studies and initiated training activities concurrently - Contributed to various web development projects, rapidly advancing skills and responsibilities - Assisted in the development of web applications using Python frameworks - Implemented frontend designs using HTML, CSS, and JavaScript - Participated in code reviews and bug fixing - Assisted in database design and management - Engaged in continuous learning and skill development	Jan 2015 - Dec 2016 (1y 10m)

KEY PROJECTS & ACHIEVEMENTS

Cloud Infrastructure & DevOps Automation Lead DevOps & Cloud Engineer Tech: AWS (EKS, EC2, S3), Docker & Kubernetes, Terraform, Ansible, GitHub Actions, Prometheus & Grafana, Python (Boto3, Scripting), Node.js - Architected, deployed, and managed highly scalable and secure cloud infrastructure on AWS for enterprise Python (Django/FastAPI) and JavaScript (React/Node) applications - Implemented Infrastructure as Code (IaC) using Terraform and Ansible to automate server provisioning and configuration management - Designed and managed containerized microservices architectures using Docker and Kubernetes (Amazon EKS) to ensure consistent environments and seamless scaling - Built robust CI/CD pipelines using GitHub Actions and Jenkins for automated testing, building, and zero-downtime deployments - Established comprehensive monitoring, logging, and alerting systems using Prometheus, Grafana, and the ELK stack to guarantee 99.99% uptime Responsibilities: - Design and maintain scalable, highly available cloud environments tailored for Python and JavaScript stacks - Develop and manage automated CI/CD deployment workflows and infrastructure pipelines - Write automation scripts using Python (Boto3) and Bash to streamline operational tasks - Perform Linux server administration, security patching, and advanced system performance tuning Key Achievements: - Reduced application deployment time by 70% through comprehensive CI/CD automation and containerization - Optimized cloud resource utilization with Kubernetes autoscaling, resulting in a 30% reduction in monthly AWS costs - Improved system reliability and incident response times by 50% by implementing advanced Prometheus and Grafana monitoring	Jan 2020 - Present
---	-------------------------------

KEY PROJECTS & ACHIEVEMENTS (CONTINUED)

Avnet SAP Based E-commerce (React JS) Lead Full Stack Developer Tech: React, SAP, HCL DX CMS, Node.js - Directed frontend development for a major e-commerce project - Engineered React components within HCL DX CMS, serving over 10 million users worldwide - Innovated a dedicated package to integrate React inside HCL DX, a significant achievement - Orchestrated component integration, completing a complex task in 6 months that previously took 1.5 years - Architected an extensive e-commerce website with HCL DX, used globally by the electronics industry, managing hundreds of thousands of products Responsibilities: - Architected the overall solution for integrating React with HCL DX CMS - Managed the development team and coordinated with stakeholders - Ensured code quality and performance optimization - Conducted code reviews and mentored junior developers Key Achievements: - Reduced development time by 50% through the creation of a custom React integration package - Improved site performance by 30% through optimized React components - Successfully launched the platform, serving millions of users worldwide	Jan 2021 - Dec 2022
Ubicquia Control-Panel (IoT Devices Control Panel) Lead Full Stack Developer Tech: Django, Angular, MQTT, Python - Managed over 4 types of IoT devices, primarily for governments, municipalities, and large companies - Devices included smart streetlights with Wi-Fi and automation features like seasonal light control - Developed an industrial Wi-Fi hotspot device - Created a highly scalable control panel to manage IoT devices for thousands of companies/governments worldwide - Designed a user interface for controlling devices at a large scale, allowing governments/companies to manage networks widely - Implemented data processing using MQTT server and Python-based backend to manage connectivity with thousands of devices over 4G LTE networks Responsibilities: - Led the development of the IoT control panel from conception to deployment - Designed and implemented the scalable architecture for device management - Coordinated with hardware teams to ensure seamless integration - Managed the development team and project timelines Key Achievements: - Successfully deployed the system for multiple government and large-scale corporate clients - Achieved real-time control and monitoring of thousands of IoT devices - Implemented innovative features like seasonal light control, resulting in significant energy savings for clients	Jan 2020 - Jan 2021
Manpow ERP Senior Full Stack Developer Tech: Django, Salesforce, FastAPI, Zapier, AWS - Developed for managing properties for rent and sale in a B2C model - Client is a major broker in the US, handling property sales, rentals, and purchases - Managed a large database using various technologies including Django, Salesforce, FastAPI, and Zapier - Integrated multiple services with Salesforce, including Google Leads, website tracking, and CRM with ERPNext, Odoo, Tryton - Implemented complex long-term maintenance strategies, primarily using Reliability-Centered Maintenance with AWS servers - Improved user productivity through new UI designs for better data entry Responsibilities: - Designed and implemented the core ERP functionality - Led the integration efforts with multiple third-party services - Optimized database performance for handling large volumes of property data - Implemented and maintained AWS server infrastructure Key Achievements: - Successfully launched the ERP system, significantly improving the client's operational efficiency - Reduced manual data entry time by 40% through improved UI and automation - Implemented a scalable solution capable of handling the client's growing property portfolio	Jan 2019 - Jan 2020

KEY PROJECTS & ACHIEVEMENTS (CONTINUED)

CRM (Product) Full Stack Developer Tech: Django, Vue.js, Node.js - Developed key features for automatic integration with hardware and software like Odoo, NextERP, QuickBooks, Tally, or Salesforce - Improved customer satisfaction by connecting with hardware and automating data gathering from real-world sources - Implemented integrations with various systems including Salesforce, Odoo, NextJS, Tally, QuickBooks, and open-source hardware - Achieved high user adoption rates due to real-world connectivity features Responsibilities: - Designed and implemented integration modules for various third-party systems - Developed APIs for seamless data exchange between the CRM and external systems - Implemented real-time data synchronization features - Conducted thorough testing to ensure reliability of integrations Key Achievements: - Successfully integrated with 5+ major ERP and accounting systems - Increased user adoption rate by 35% through improved real-world connectivity features - Reduced manual data entry errors by 60% through automated data gathering	Jan 2018 - Jan 2019
ERP and Production Management Module (Product) Senior Developer Tech: React Native, Django - Served industries like plastic molding machine makers and MNC companies - Improved production efficiency through a mobile app for faster data capture from engineers and laborers - Mobile app usage focused on updating product status in the supply chain - Provided easy-to-use modules for engineers to track part status, resulting in comprehensive production status dashboards - Achieved cost savings for clients through improved production tracking and management Responsibilities: - Developed the mobile application using React Native - Designed and implemented the backend API using Node.js - Created real-time dashboards for production status monitoring - Implemented data synchronization between mobile devices and central servers Key Achievements: - Reduced production data collection time by 50% - Improved overall production efficiency by 25% for client companies - Successfully deployed the solution to 10+ manufacturing companies	Jan 2017 - Jan 2018
IP Management System for ISP Senior Developer Tech: Django, Python, PostgreSQL - Managed an uncountable number of IP addresses - Improved efficiency in managing internet connectivity and billing for customers compared to the previous system - Successfully integrated APIs to connect the control panel directly with customer internet services and network switches - Enhanced scalability, making it easier to manage network switches serving thousands of users across towns Responsibilities: - Designed and implemented the IP management system architecture - Integrated APIs for seamless communication with customer internet services and network switches - Optimized system performance for handling large volumes of IP addresses - Conducted thorough testing to ensure system reliability Key Achievements: - Successfully deployed the system for a major ISP, serving thousands of users - Improved customer satisfaction through improved internet connectivity management - Reduced manual effort in billing and network management by 70%	Jan 2016 - Jan 2017
Mile 2 Smiley (Backend) Backend Developer Tech: Django, Python, PostgreSQL - Developed a healthcare monitoring system with telehealth capabilities and ECG data integration - Features included patient monitoring, telehealth functionality, and ECG data integration - Specific metrics on patient numbers, user satisfaction rates, and health outcome improvements were not available as the project was in development phase Responsibilities: - Designed and implemented the healthcare monitoring system architecture - Integrated telehealth capabilities and ECG data integration - Developed patient monitoring and telehealth features - Conducted thorough testing to ensure system reliability Key Achievements: - Successfully launched the healthcare monitoring system for a major hospital - Improved patient monitoring and telehealth capabilities - Integrated ECG data integration for better healthcare monitoring	Jan 2015 - Jan 2016

KEY PROJECTS & ACHIEVEMENTS (CONTINUED)

Various Service-Based Development Projects

Jan 2014 - Jan 2015

Full Stack Developer

Tech: Django, Python, PostgreSQL, HTML, CSS, JavaScript, jQuery, Wagtail (Python CMS), Saleor

- Delivered more than 20 websites
- Implemented various payment gateways including Stripe, PayPal, RazorPay, and others
- Developed functionalities such as e-commerce platforms, administration-level data management systems, REST APIs, server management, and database management
- Provided tech support for ongoing projects
- Successfully delivered 30+ websites using Wagtail (Python CMS)
- Developed 2+ e-commerce websites using Saleor (Python E-commerce)

Responsibilities:

- Designed and implemented website architectures
- Integrated various payment gateways and functionalities
- Developed REST APIs and server management solutions
- Managed database management and optimization

Key Achievements:

- Successfully delivered over 50 websites for various clients
- Implemented e-commerce platforms and administration-level data management systems
- Integrated various payment gateways for seamless transactions

Additional Experience: Gujarati Stage-Drama, Music Operator

- Worked with Gujarati Drama Industry as a stage artist for 500+ shows
- Transitioned to IT industry as a professional, reducing involvement in media
- Leveraged strong family background in Gujarati Drama to occasionally continue work in the field
- This experience eliminated audience nervousness and stage fear, enabling confident public speaking in front of large groups

INTERESTS & HOBBIES

Computing

Exploring and working with various aspects of computer science and technology

Chess

Board game • Strategic thinking

Outdoor and Indoor Gaming

Football (Outdoor • Team sport)

Cricket (Outdoor • Team sport)

Carom (Indoor • 2-4 players)

Chess (Indoor • 2 players)

Evening walks (Physical exercise)

Stress relief, Improved fitness, Better sleep

EDUCATION

M.Sc. IT

Hemchandracharya North Gujarat University, Ahmedabad, India

2012 - 2017

LANGUAGES

English (Professional)

Hindi (Expert)

Gujarati (Native)

CERTIFICATIONS

Certified FastAPI Developer

FastAPI Certification Program

Sangeet Natak Academy

Government of Gujarat

AWARDS

2020 Star Performer of the Year

Anblicks Inc. (Formerly KNOWARTH)
